**Onderwerp:** Gegevens broedvogels

Beste,

Hierbij een bestand met de per utm 5x5 hok voorkomende broedvogelsoorten. Het betreft hier gegevens uit de periode 2000-2002, gebaseerd op tellingen uitgevoerd door vrijwilligers in het kader van de opmaak van een nieuwe broedvogelatlas voor Vlaanderen. De verklaring bij de broedzekerheidscodes is als volgt: 1=mogelijk broedend, 2=waarschijnlijk broedend en 3=zeker broedend. Om tot deze codes te komen, moesten de waarnemingen voldoen aan bepaalde criteria dewelke je kan nalezen in de methodehandleiding bij dit project:
